

# International Services and Consulting

International trade is rapidly expanding and many U.S. companies are operating overseas or are evaluating cross-border expansion. The myriad regulations, laws and policies that govern the global marketplace are formidable. You need guidance on issues in foreign markets, and it's virtually impossible for one firm to have all the answers you need.

***Our significant experience working with international clients and our knowledge of the global marketplace, as well as U.S. regulations, make us the perfect partner for doing business worldwide.***

That's why our independent firm is associated with Moore Global. This relationship gives us access to accounting professionals in almost every country in the world and allows us to provide a breadth and depth of services on par with the global firms.

MSPC has forged close working relationships with many of the other Moore Global member firms by traveling to their countries and working side-by-side with their teams. This gives us access to people who know the local languages, customs, culture, rules, and regulations. These relationships also provide us the opportunity to meet and work with other service providers in the U.S. and abroad, such as attorneys, underwriters and investment advisors who often become resources for our clients.

Complementing our array of international services is our hands-on, personal approach to serving clients. We approach each engagement based on the unique goals of the organization or individual and offer solutions customized to their needs.

MSPC is well-versed in both U.S. GAAP and International accounting standards (IFRS). Our significant experience working with international clients and our knowledge of U.S. regulations and the global marketplace make us the perfect partner for doing business worldwide.
